

MSA Self-Contained Breathing Apparatus System

[Ordering Information]

SELF-CONTAINED BREATHING APPARATUS	
Based on decades of experience, MSA offers 4 SCBA presets – configured systems for the most common applications. As an alternative to the SCBA presets you can configure your individual SCBA system by picking components according to your needs. Please use our easy-to-use configurator, available as a CD or online www.msa-scba.com

alphaCLICK Rapid cylinder exchange coupling
 alphaCLICK is available in 2 versions for use with 200 bar & 300 bar cylinders, on both, MSA SCBAs & filling panels. The diagram below shows the possible combinations.
 The coupling set “200/300 bar” can be combined with 200 bar or 300 bar cylinders. The coupling set “300 bar” is recommended for 300 bar units, but can also be used with 200 bar cylinders [with the matching cylinder adapter]. The coupling set “300 bar-Q” must be used if the SCBA features a QuickFill [Q] connection.
